(with pultrusion ribs & 1-1/2" Pole)

**MODEL #203SRP** 9' STAR UMBRELLA  
(with pultrusion ribs & 1-1/2" Pole)

Our new and improved hub is solid aluminum, machined down to a sleek modern design. Each rib is fastened to the hub via stainless steel pins, which are secured by large screws, permitting easy repairs in the field. This durable umbrella and our patented rotating canopy, will permit you to experience the most dependable umbrella in the industry for all weather conditions.

## STANDARD ALUMINUM UMBRELLA FEATURES

- Marine grade aluminum pole tempered to provide lasting strength & durability
- Rotating canopy (Patent No. 5020557) releases stress from the pole and hubs
- Brushed aluminum finish or white polyurethane powder coat finish
- Stainless steel hardware and neoprene spacers protect all moving parts from corrosion and allow for easy operation
- Reinforced pockets secure the canopy to the ribs of the frame, guaranteed not to fail.

## OPTIONAL FEATURES

- Double vent - allows air to escape from the canopy
- Anodized aluminum finish
- Unbreakable pultrusion ribs
