

Imaginative Design, Superbly Engineered-

Created by imaginative designers and crafted by the Pennsylvania Dutch, these superbly engineered umbrellas cast an imposing shadow over the industry.

An octagon market umbrella with 8 ribs and pole diameters of 2" or 2 1/4". Canopy sizes are 11', 12 1/2', and 15'. (15' not recommended for use in strong winds).

STANDARD UMBRELLA FEATURES

Lasting Beauty

- Distinctive hardwood grains are preserved by slow kiln drying, sealing, and a slow drying of multiple finishes.

Strength, Engineering Quality, and Durability

- A full-length solid ash pole is laminated for strength and protection against warping.
- Aluminum flush pole guard protects pole and minimizes swelling in stand.
- Horizontal multi-laminated hub is reinforced by a band of 12-ply Baltic Birch plywood. Hub design accents strength, keeping the wood girth constant in all weather.
- Multi-laminated finial provides further protection against excessive exposure to weather.
- Flexible, durable, high-gloss finish for outdoor use.
- Solid brass fabric-connecting brackets are sealed with clear lacquer. Solid brass grommets and screws attach the fabric. All screws are flush to protect the fabric when umbrella is closed.
- Heavy, solid brass eye-screw and chain connect the positioning pin.
